

**DANIEL J. BALFOUR, E.I.T.**  
**SENIOR PROJECT MANAGER**

Mr. Balfour graduated from the University of Rhode Island in 1996 with a BS degree in Civil Engineering, with a concentration in transportation and highway design. He is preparing to take the Civil Professional Engineer licensure exam. Dan is a Certified Project Management Professional in accordance with the Project Management Institute.

Mr. Balfour spent nearly 3 years with MACTEC working on numerous Maine DOT roadway design projects of varying size. When he was not working on DOT projects, he was supporting other project managers with a very large commercial project located just outside the Meadowlands in New Jersey. This project included a fifty-four hole golf course, conference center, hotel, and residential townhomes.

Dan left Ames MSC in May 2006 to join Jones & Beach Engineers, Inc., as a Senior Project Manager and Design Engineer. He is managing and designing residential and commercial projects located throughout the northeast.

As a Project Manager, Mr. Balfour brings over 10 years of experience in the design and management of projects related to DOT road design, FAA airport design, drainage analysis, residential and commercial development, and permitting at the Local, State and Federal levels. He represents clients at Planning Board Meetings, Zoning Board Hearings, Conservation Commission Meetings, as well as project pre-construction meetings with building contractors, site developers, and Town representatives. Dan specializes in low-impact-design (LID) projects to protect the environment.

His software skills include AutoCAD, HydroCAD, Haestad, Microstation, Eaglepoint, Inroads, and GEOPAK.

**Project Highlights:**

- Plaistow, NH: 12 unit, 24,000 S.F. Industrial Contractor Facility ~ Project Manager & Design Engineer
- Hampton, NH: 31 unit, 45,000 S.F. Hotel Condominium ~ Project Manager & Site Designer
- Hampton, NH: 5 unit Condominium Project ~ Project Manager & Site Designer
- Barrington, NH: 12 unit Condominium Project ~ Project Manager & Site Designer
- Exeter, NH: St. Michael Parish Campus with a 15,500 S.F. Church and 9,300 S.F. Parish Center, and accessory structures with porous pavement & low-impact-design (LID) elements ~ Project Manager and Site Designer
- Exeter, NH: 11,000 S.F. Dental Clinic for the Exeter Hospital with porous pavement and LID ~ Site Designer
- Exeter, NH: 14 unit Condominium Development with porous pavement and LID ~ Project Manager and Site Designer
- Hooksett, NH: 56,000 S.F. Medical Office Building site plan with parking and municipal utilities ~ Site Designer
- Rochester, NH: 47 Single-Family Residential Conservation Open-Space Subdivision with 2,500 L.F. of roadway and municipal utilities ~ Project Manager and Site Designer
